SUMMARY

- Highly skilled & motivated senior software engineer with 8+ years of experience in delivering top-notch robust and scalable applications.
- Developed core workflows for java development in VS Code and Cursor IDE with bazel build system
- Previously delivered software working on a build fleet of 5000+ instances, improved throughput & productivity for over 2000+ developers. Demonstrated strong analytical & problem-solving skills & ability to follow through with projects from inception to completion.
- Core expertise in application development, build & distributed systems, and server-side technologies like Spring framework, JPA, RESTful & GraphQL based webservices using Spring Boot.
- Expertise in backend technologies like Java, Go, Node.js, Typescript, Groovy, SQL and NoSQL Databases
- Extensively worked with Jenkins, Docker, Kubernetes, Mesos, GCP and AWS.
- Worked on monitoring tools like Splunk, SignalFx, Elasticsearch, Kibana, Graphana
- Worked with AI/ML models like GPT, Claude, Github Copilot

SKILLS

- **Programming Languages:** Java, Python, Go, Typescript, Groovy, Node.js, C, Bash, JavaScript
- **Databases:** MySQL, Oracle, MongoDB
- **Tools and Technologies:** Spring, Spring Boot, Jenkins, GraphQL, Hibernate ORM and JPA repositories, Argo, Docker, Kubernetes, Mesos, CI/CD, Build Tools (Bazel/Buck/Gradle/Maven), GCP, AWS, Unix, Git, Distributed Computing, Splunk, SignalFx, Elasticsearch, Kibana, Machine Learning, Agile, Android, Buildkite, VS Code, Cursor, AI Models, RAG

EXPERIENCE

Uber, Sunnyvale, CA

Senior Software Engineer

Nov 2022 - present

- Worked in the IDE team and led POC, design and development of core workflows for language intelligence in VS Code Java with bazel, which was absent in the industry previously. Tracked metrics to identify user engagement and addressed bugs proactively
- Added debugging support, index generation using custom indexing protocol and helped refine User Experience based on developer feedback.
- Helped with adoption of Cursor, AI based IDE, by addressing known gaps, writing relevant runbooks and setup guides and resolving issues.
- Helped with java monorepo's migration from buck to bazel build system
- Collaborated with external teams to define project scope and get help when needed
- Helped team members on issues, dealt with incidents, answered user queries during call rotations.

PayPal Inc, San Jose, CA

Software Engineer 3

April 2020 - Nov 2022

- **Technical Lead** for Java based packaging software used for packaging all of PayPal's microservices.
- Designed, developed, and delivered multiple features in above product enabling multiple domains with features like geo Data localization, Kubernetes migration, Legacy service deprecations.
- Participated actively in code & design reviews for multiple applications. Recommended usage of design patterns, latest frameworks and libraries and industry wide accepted best practices. Suggested and implemented stability and performance improvements by capturing metrics with SignalFx.
- Lead the Design, Development and POC of Next Gen pipeline infrastructure based on Argo from scratch.
- Owned, Improved, and maintained dependency tracking software built on Spring Boot with Oracle at backend
- Enhanced Jenkins plugin for improving build system reliability and customer experience
- Helped team members with incidents, queries and their tasks on need-to-need basis

Software Engineer 2

March 2018 - April 2020

- Worked on design, development, and integration of the stack agnostic unified CI pipeline infrastructure at PayPal for Build-Packaging team impacting 2000+ developers across 5000+ instances. Build a critical piece of software involved in the abstraction logic and enabled parallel execution helping bring down build time by >40%.
- Developed Jenkins plugins for enabling features like build notification, app deployment, key management in SDLC
- Developed Python based administration software for interacting with CI cluster for better cluster management

Software Engineering Intern

May 2017 - Aug 2017

- As part of the Core Platforms and Infrastructure team, worked on a SpringBoot application to build configurable infrastructure for collecting user metrics across millions of transactions at PayPal using Java, Kafka, Yam, ElasticSearch.
- Built Kibana dashboards to provide insights to stakeholders into PayPal's user data from data collected above

University Technology Office, ASU, Tempe, AZ

Amazon Echo Developer, Part time

Feb 2017 - May 2017

- Worked on developing Voice based Software solutions using **Python**, Amazon **Alexa** & Range of AWS micro-services like **Lambda**, S3, DynamoDB, CloudWatch, IAM, API Gateway.
- As a result, Arizona State University was able to launch a first of its kind "Smart Dorm with Alexa" with help of Amazon's collaboration

Nvidia Graphics Pvt. Ltd, Pune, India

System Software Engineer

July 2014 - July 2016

- Implemented & maintained software IIC/I2C protocol for graphics chip, improving chip communication speed helping improve GPU startup latency significantly.
- Worked on software optimization, issue resolution and power saving features on DP1.2 protocol in GPU's display pipeline

Credit Suisse Pvt. Ltd, Pune, India

Intern Information Technology

June 2013 - July 2013

- Developed Java application for subscribing to remote processes and triggering events there, displaying logs of the activity on the application, helping QAs to quickly analyze any errors in the overall subscription workflow increasing their productivity

TECHNICAL PROJECTS

- **Human Activity Recognition using SVM model** (Android, Java, Machine Learning) [Link](#) 2016
- **LevelUp – Android based RPG Application** (Android, Java, SQLite, RESTful APIs) [Link](#) 2016
- **Visualizer for Data Structures** (Java, Swing, Data Structures) [Link](#) 2013
- **Hotspot Detection in Data Centres using Wireless Sensor Networks** (C, WSN, Distributed Computing) [Link](#) 2014
- **Content Hosting and Sharing website** (PHP, MySQL, HTML, CSS, JavaScript) 2012

EDUCATION

- **Master of Computer Science** Arizona State University GPA: 3.7 | Dec 2017
- **Bachelor of Technology in Information Technology** College of Engineering Pune GPA: 3.8 | May 2014
